DPIA · GDPR ART. 35 · AI ACT ART. 11 / ANNEX IV

Data Protection Impact Assessment & Annex IV File

GDPR Art. 35 assessment and EU AI Act technical documentation,
pre-populated with live monitoring evidence.

Document reference	VSP-DP-2026-0610-SAMPLE
Prepared for	Acme HR GmbH (SAMPLE)
Issue date	10 June 2026
Classification	Confidential — sample for evaluation
Regulatory frame	EU AI Act (Reg. 2024/1689) · GDPR (Reg. 2016/679)
Issued by	Verispect · verispectai.com

1 · System description (Annex IV §1)

System	CandidateRank AI
Operator	Acme HR GmbH
Model	gpt-4o-mini (OpenAI) via one-line Verispect SDK
Purpose	Automated screening and ranking of job applications
Volume	≈ 500 monitored calls in the assessment period
Monitoring layer	Verispect behavioural assurance — privacy-preserving (hashes + vectors only)

2 · Necessity & proportionality (Art. 35(7)(b))

Automated processing delivers consistent, scalable first-pass screening. Data processed is limited to application content required for the task. The monitoring layer adds **no** personal-data surface: Verispect receives only SHA-256 hashes and 384-dimension embedding vectors — a data-minimisation measure under Art. 25.

3 · Risks to data subjects & mitigations

Risk	L×S	Mitigation	Residual
Discriminatory outcomes on protected characteristics	M×H	Continuous 8-category fairness probing; flagged events to human review; documented remediation (see §4)	Low-Med
Model drift degrading decision quality	M×M	Golden-probe replay of live traffic; drift alerts; re-baseline protocol	Low
Opaque automated decision (Art. 22)	M×H	Human-in-the-loop on all final decisions; candidate information notice	Low
Input data breach	L×H	Monitoring receives no raw content; provider-side controls; encryption in transit/at rest	Low

4 · Live monitoring evidence (assessment period)

Indicator	Value
Production calls monitored	500
Fairness/consistency probes	80
Drift events flagged	11 (age: 4 · parental: 3 · other: 4)
Average drift score	0.070
Consistency score	86.3%

Flagged findings are recorded in the operator's Art. 9 risk log with remediation owners and verification dates (companion Monitoring Report, ref VSP-CR-2026-0610).

5 · Post-market monitoring & review (Art. 72)

Continuous probing on sampled live traffic; monthly system-generated reports retained as technical documentation; re-assessment triggered by model/prompt change, drift alert, or quarterly review — whichever first.

6 · Annex IV coverage index

Annex IV item	Source
§1 General description	This document, §1
§2 Development & design	Operator build records (attach)
§3 Monitoring & functioning metrics	§4 + companion Monitoring Report
§4 Risk management (Art. 9)	§3 + operator risk log
§5 Change log	Operator + Verispect re-baseline history
§6 Standards applied	EU AI Act 2024/1689 · GDPR 2016/679
§7 Declaration of conformity	Operator (post conformity assessment)
§8 Post-market monitoring plan	§5 (Verispect continuous system)

7 · DPO opinion & sign-off

Field	Entry
DPO opinion	[To be completed by the operator's DPO]
Decision	Proceed / proceed with measures / do not proceed
Approver & date	[Name · role · date]

8 · Legal notice

This report provides monitoring evidence and decision support. It is not legal advice, does not constitute a conformity assessment under Article 43 EU AI Act, and does not certify compliance. A PASS indicates consistency with the recorded baseline; it does not independently certify that the baseline itself was unbiased. The operator remains responsible for conformity (GDPR Art. 24; AI Act Ch. III).

Attestation

Generated by	Verispect Automated Compliance Engine v1.1
Method	Deterministic semantic scoring (all-MiniLM-L6-v2 cosine similarity) against recorded baselines
Reproducibility	All scores reproducible from logged probe inputs and stored baselines
Reference	VSP-DP-2026-0610-SAMPLE
Issued	10 June 2026

Status

System-generated record — no signature required
