

Get your AI audit-ready before the deadline. In one day.

The EU AI Act requires high-risk AI — hiring, credit, insurance, legal — to **prove** it isn't drifting or discriminating. Verispect generates that proof automatically, in one line of code. We never see your data — only hashes and vectors.

What every Founding Customer gets

✓ AI Act Readiness Report	Branded, article-mapped compliance PDF, generated on your real model.
✓ Continuous monitoring	Active bias & drift probes + automatic monthly report.
✓ White-glove setup	We integrate the one line with you on a 30-min call. Zero effort.
✓ “Monitoring Active” badge	Verispect Verified badge for your site & security page.
✓ Founding rate, locked for life	\$1,500/mo or \$15,000/yr — locked before it rises to \$2,500. Never increases for you.
✓ Direct founder line	Private Slack with Ajay, whenever you need him.

Zero risk to look. Run the free 5-minute snapshot first — see your model's real drift score. Only join if it shows you something worth fixing. Cancel anytime, no lock-in.

Why now

From **2 August 2026**, continuous monitoring (Art. 72), logging (Art. 13) and bias governance (Art. 10) become mandatory for high-risk AI. Employment & credit AI are explicitly high-risk (Annex III §4). Enterprise buyers are already asking for this evidence — ahead of the law. (*A pending Digital Omnibus may move standalone Annex III to Dec 2027 — but procurement isn't waiting.*)

Why Verispect, not a logging tool

	Observability tools	Verispect
Logs what your model said	Yes	Yes
Actively tests for drift & bias in production	—	Yes
Protected-characteristic bias probes (8)	—	Yes
EU AI Act readiness report	—	Yes
Never sees your raw data	—	Yes

Claim one of 20 Founding spots.

Run your free snapshot in 5 minutes — one line, no card, we never see your data.
